

2008 英语 (一) Part A · Text2

文章主题	科学出版从传统期刊模式转向线上与开放获取模式
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 26-30 题
第二天	遮住译文重读、重做题、复查错因与替换词

保留三次原文使用机会：连续干净原文用于检测；笔译页用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照你的纸质版。

1

1 限时第一读：先看 5 个英文题干，不看选项

用1-2分钟建立阅读导航。圈出段落、人物、引号、题型信号；不分析答案。

No.	Question stem – English only	My signal
26	In the first paragraph, the author discusses	
27	Which of the following is true of the OECD report?	
28	According to the text, online publication is significant in that	
29	With the open-access publishing model, the author of a paper is required to	
30	Which of the following best summarizes the text?	

这一阶段只做三件事

标出生词但不停下；标出转折/因果/让步；读到相关段落才回来看该题选项。不查词，不看译文，不看解析。

我的英文题干导航标记

2

2 干净原文 A：限时读文

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] It used to be so straightforward. A team of researchers working together in the laboratory would submit the results of their research to a journal. A journal editor would then remove the authors' names and affiliations from the paper and send it to their peers for review. Depending on the comments received, the editor would accept the paper for publication or decline it. Copyright rested with the journal publisher, and researchers seeking knowledge of the results would have to subscribe to the journal.

[P2] No longer. The Internet—and pressure from funding agencies, who are questioning why commercial publishers are making money from government-funded research by restricting access to it—is making access to scientific results a reality. The Organization for Economic Co-operation and Development (OECD) has just issued a report describing the far-reaching consequences of this. The report, by John Houghton of Victoria University in Australia and Graham Vickery of the OECD, makes heavy reading for publishers who have, so far, made handsome profits. But it goes further than that. It signals a change in what has, until now, been a key element of scientific endeavor.

[P3] The value of knowledge and the return on the public investment in research depends, in part, upon wide distribution and ready access. It is big business. In America, the core scientific publishing market is estimated at between \$7 billion and \$11 billion. The International Association of Scientific, Technical and Medical Publishers says that there are more than 2,000 publishers worldwide specializing in these subjects. They publish more than 1.2 million articles each year in some 16,000 journals.

[P4] This is now changing. According to the OECD report, some 75% of scholarly journals are now online. Entirely new business models are emerging; three main ones were identified by the report's authors. There is the so-called big deal, where institutional subscribers pay for access to a collection of online journal titles through site-licensing agreements. There is open-access publishing, typically supported by asking the author (or his employer) to pay for the paper to be published. Finally, there are open-access archives, where organizations such as universities or international laboratories support institutional repositories. Other models exist that are hybrids of these three, such as delayed open-access, where journals allow only subscribers to read a paper for the first six months, before making it freely available to everyone who wishes to see it. All this could change the traditional form of the peer-review process, at least for the publication of papers.

2.2

第一次做题：作答 26-30 题

现在才看选项。先独立完成五道题；需要时回原文定位。

26. In the first paragraph, the author discusses

- [A] the background information of journal editing.
- [B] the publication routine of laboratory reports.
- [C] the relations of authors with journal publishers.
- [D] the traditional process of journal publication.

27. Which of the following is true of the OECD report?

- [A] It criticizes government-funded research.
- [B] It introduces an effective means of publication.
- [C] It upsets profit-making journal publishers.
- [D] It benefits scientific research considerably.

28. According to the text, online publication is significant in that

- [A] it provides an easier access to scientific results.
- [B] it brings huge profits to scientific researchers.
- [C] it emphasizes the crucial role of scientific knowledge.
- [D] it facilitates public investment in scientific research.

29. With the open-access publishing model, the author of a paper is required to

- [A] cover the cost of its publication.
- [B] subscribe to the journal publishing it.
- [C] allow other online journals to use it freely.
- [D] complete the peer-review before submission.

30. Which of the following best summarizes the text?

- [A] The Internet is posing a threat to publishers.
- [B] A new mode of publication is emerging.
- [C] Authors welcome the new channel for publication.
- [D] Publication is rendered easier by online service.

3.1

第 1 段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 It used to be so straightforward.

S2 A team of researchers working together in the laboratory would submit the results of their research to a journal.

S3 A journal editor would then remove the authors' names and affiliations from the paper and send it to their peers for review.

S4 Depending on the comments received, the editor would accept the paper for publication or decline it.

S5 Copyright rested with the journal publisher, and researchers seeking knowledge of the results would have to subscribe to the journal.

本段英语原文（按句分行）

S1 It used to be so straightforward.

S2 A team of researchers working together in the laboratory would submit the results of their research to a journal.

S3 A journal editor would then remove the authors' names and affiliations from the paper and send it to their peers for review.

S4 Depending on the comments received, the editor would accept the paper for publication or decline it.

S5 Copyright rested with the journal publisher, and researchers seeking knowledge of the results would have to subscribe to the journal.

段落中心思想（用一句话概括）

第 4 段：逐句笔译与原文订正

S1 This is now changing.

S2 According to the OECD report, some 75% of scholarly journals are now online.

S3 Entirely new business models are emerging; three main ones were identified by the report's authors.

S4 There is the so-called big deal, where institutional subscribers pay for access to a collection of online journal titles through site-licensing agreements.

S5 There is open-access publishing, typically supported by asking the author (or his employer) to pay for the paper to be published.

S6 Finally, there are open-access archives, where organizations such as universities or international laboratories support institutional repositories.

S7 Other models exist that are hybrids of these three, such as delayed open-access, where journals allow only subscribers to read a paper for the first six months, before making it freely available to everyone who wishes to see it.

S8 All this could change the traditional form of the peer-review process, at least for the publication of papers.

4

全文核对后：正式重做 26-30 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

26. In the first paragraph, the author discusses

- [A] the background information of journal editing.
- [B] the publication routine of laboratory reports.
- [C] the relations of authors with journal publishers.
- [D] the traditional process of journal publication.

27. Which of the following is true of the OECD report?

- [A] It criticizes government-funded research.
- [B] It introduces an effective means of publication.
- [C] It upsets profit-making journal publishers.
- [D] It benefits scientific research considerably.

28. According to the text, online publication is significant in that

- [A] it provides an easier access to scientific results.
- [B] it brings huge profits to scientific researchers.
- [C] it emphasizes the crucial role of scientific knowledge.
- [D] it facilitates public investment in scientific research.

29. With the open-access publishing model, the author of a paper is required to

- [A] cover the cost of its publication.
- [B] subscribe to the journal publishing it.
- [C] allow other online journals to use it freely.
- [D] complete the peer-review before submission.

30. Which of the following best summarizes the text?

- [A] The Internet is posing a threat to publishers.
- [B] A new mode of publication is emerging.
- [C] Authors welcome the new channel for publication.
- [D] Publication is rendered easier by online service.

5 原文 D：第二次做题后定位

先看解析，回原文再找一次定位句和同义替换。

[P1] It used to be so straightforward. A team of researchers working together in the laboratory would submit the results of their research to a journal. A journal editor would then remove the authors' names and affiliations from the paper and send it to their peers for review. Depending on the comments received, the editor would accept the paper for publication or decline it. Copyright rested with the journal publisher, and researchers seeking knowledge of the results would have to subscribe to the journal.

[P2] No longer. The Internet—and pressure from funding agencies, who are questioning why commercial publishers are making money from government-funded research by restricting access to it—is making access to scientific results a reality. The Organization for Economic Co-operation and Development (OECD) has just issued a report describing the far-reaching consequences of this. The report, by John Houghton of Victoria University in Australia and Graham Vickery of the OECD, makes heavy reading for publishers who have, so far, made handsome profits. But it goes further than that. It signals a change in what has, until now, been a key element of scientific endeavor.

[P3] The value of knowledge and the return on the public investment in research depends, in part, upon wide distribution and ready access. It is big business. In America, the core scientific publishing market is estimated at between \$7 billion and \$11 billion. The International Association of Scientific, Technical and Medical Publishers says that there are more than 2,000 publishers worldwide specializing in these subjects. They publish more than 1.2 million articles each year in some 16,000 journals.

[P4] This is now changing. According to the OECD report, some 75% of scholarly journals are now online. Entirely new business models are emerging; three main ones were identified by the report's authors. There is the so-called big deal, where institutional subscribers pay for access to a collection of online journal titles through site-licensing agreements. There is open-access publishing, typically supported by asking the author (or his employer) to pay for the paper to be published. Finally, there are open-access archives, where organizations such as universities or international laboratories support institutional repositories. Other models exist that are hybrids of these three, such as delayed open-access, where journals allow only subscribers to read a paper for the first six months, before making it freely available to everyone who wishes to see it. All this could change the traditional form of the peer-review process, at least for the publication of papers.
