

2009 英语 (一) Part A · Text 1

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 21-25 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

2 干净原文 A：限时读文

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] Habits are a funny thing. We reach for them mindlessly, setting our brains on auto-pilot and relaxing into the unconscious comfort of familiar routine. "Not choice, but habit rules the unreflecting herd," William Wordsworth said in the 19th century. In the ever-changing 21st century, even the word "habit" carries a negative implication.

[P2] So it seems paradoxical to talk about habits in the same context as creativity and innovation. But brain researchers have discovered that when we consciously develop new habits, we create parallel paths, and even entirely new brain cells, that can jump our trains of thought onto new, innovative tracks.

[P3] Rather than dismissing ourselves as unchangeable creatures of habit, we can instead direct our own change by consciously developing new habits. In fact, the more new things we try—the more we step outside our comfort zone—the more inherently creative we become, both in the workplace and in our personal lives.

[P4] But don't bother trying to kill off old habits; once those ruts of procedure are worn into the brain, they're there to stay. Instead, the new habits we deliberately press into ourselves create parallel pathways that can bypass those old roads.

[P5] "The first thing needed for innovation is a fascination with wonder," says Dawna Markova, author of *The Open Mind*. "But we are taught instead to 'decide,' just as our president calls himself 'the Decider.'" She adds, however, that "to decide is to kill off all possibilities but one. A good innovational thinker is always exploring the many other possibilities."

[P6] All of us work through problems in ways of which we're unaware, she says. Researchers in the late 1960s discovered that humans are born with the capacity to approach challenges in four primary ways: analytically, procedurally, relationally (or collaboratively) and innovatively. At the end of adolescence, however, the brain shuts down half of that capacity, preserving only those modes of thought that have seemed most valuable during the first decade or so of life.

[P7] The current emphasis on standardized testing highlights analysis and procedure, meaning that few of us inherently use our innovative and collaborative modes of thought. " This breaks the major rule in the American belief system—that anyone can do anything," explains M. J. Ryan, author of the 2006 book *This Year I Will...* and Ms. Markova's business partner. " That's a lie that we have perpetuated, and it fosters commonness. Knowing what you're good at and doing even more of it creates excellence." This is where developing new habits comes in.

2.2

第一次做题：作答 21-25 题

现在才看选项。先独立完成五道题；需要时回原文定位。

21. In Wordsworth's view, "habits" is characterized by being

- [A] casual.
- [B] familiar.
- [C] mechanical.
- [D] changeable.

22. Brain researchers have discovered that the formation of new habits can be

- [A] predicted.
- [B] regulated.
- [C] traced.
- [D] guided.

23. The word "ruts" (Line 1, Para. 4) is closest in meaning to

- [A] tracks.
- [B] series.
- [C] characteristics.
- [D] connections.

24. Dawna Markova would most probably agree that

- [A] ideas are born of a relaxing mind.
- [B] innovativeness could be taught.
- [C] decisiveness derives from fantastic ideas.
- [D] curiosity activates creative minds.

25. Ryan's comments suggest that the practice of standardized testing

- [A] prevents new habits from being formed.
- [B] no longer emphasizes commonness.
- [C] maintains the inherent American thinking mode.
- [D] complies with the American belief system.

第 1 段：逐句笔译与原文订正

S1 Habits are a funny thing.

S2 We reach for them mindlessly, setting our brains on auto-pilot and relaxing into the unconscious comfort of familiar routine.

S3 "Not choice, but habit rules the unreflecting herd," William Wordsworth said in the 19th century.

S4 In the ever-changing 21st century, even the word "habit" carries a negative implication.

全文核对后：正式重做 21-25 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

21. In Wordsworth's view, "habits" is characterized by being

- [A] casual.
- [B] familiar.
- [C] mechanical.
- [D] changeable.

22. Brain researchers have discovered that the formation of new habits can be

- [A] predicted.
- [B] regulated.
- [C] traced.
- [D] guided.

23. The word "ruts" (Line 1, Para. 4) is closest in meaning to

- [A] tracks.
- [B] series.
- [C] characteristics.
- [D] connections.

24. Dawna Markova would most probably agree that

- [A] ideas are born of a relaxing mind.
- [B] innovativeness could be taught.
- [C] decisiveness derives from fantastic ideas.
- [D] curiosity activates creative minds.

25. Ryan's comments suggest that the practice of standardized testing

- [A] prevents new habits from being formed.
- [B] no longer emphasizes commonness.
- [C] maintains the inherent American thinking mode.
- [D] complies with the American belief system.

5 原文 D：第二次做题后定位

先看解析，回原文再找一次定位句和同义替换。

[P1] Habits are a funny thing. We reach for them mindlessly, setting our brains on auto-pilot and relaxing into the unconscious comfort of familiar routine. "Not choice, but habit rules the unreflecting herd," William Wordsworth said in the 19th century. In the ever-changing 21st century, even the word "habit" carries a negative implication.

[P2] So it seems paradoxical to talk about habits in the same context as creativity and innovation. But brain researchers have discovered that when we consciously develop new habits, we create parallel paths, and even entirely new brain cells, that can jump our trains of thought onto new, innovative tracks.

[P3] Rather than dismissing ourselves as unchangeable creatures of habit, we can instead direct our own change by consciously developing new habits. In fact, the more new things we try—the more we step outside our comfort zone—the more inherently creative we become, both in the workplace and in our personal lives.

[P4] But don't bother trying to kill off old habits; once those ruts of procedure are worn into the brain, they're there to stay. Instead, the new habits we deliberately press into ourselves create parallel pathways that can bypass those old roads.

[P5] "The first thing needed for innovation is a fascination with wonder," says Dawna Markova, author of *The Open Mind*. "But we are taught instead to 'decide,' just as our president calls himself 'the Decider.'" She adds, however, that "to decide is to kill off all possibilities but one. A good innovational thinker is always exploring the many other possibilities."

[P6] All of us work through problems in ways of which we're unaware, she says. Researchers in the late 1960s discovered that humans are born with the capacity to approach challenges in four primary ways: analytically, procedurally, relationally (or collaboratively) and innovatively. At the end of adolescence, however, the brain shuts down half of that capacity, preserving only those modes of thought that have seemed most valuable during the first decade or so of life.

[P7] The current emphasis on standardized testing highlights analysis and procedure, meaning that few of us inherently use our innovative and collaborative modes of thought. " This breaks the major rule in the American belief system—that anyone can do anything," explains M. J. Ryan, author of the 2006 book *This Year I Will...* and Ms. Markova's business partner. " That's a lie that we have perpetuated, and it fosters commonness. Knowing what you're good at and doing even more of it creates excellence." This is where developing new habits comes in.
