

2013 英语 (一) Part A · Text 2

精读全流程：原文、做题、笔译、订正、重做、选项与复读

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 26-30 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

1

1 限时第一读：先看 5 个英文题干，不看选项

用 1-2 分钟建立阅读导航；圈出特殊定位词与题型信号，不分析答案。

2 干净原文 A：限时读文

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] An old saying has it that half of all advertising budgets are wasted—the trouble is, no one knows which half. In the internet age, at least in theory, this fraction can be much reduced. By watching what people search for, click on and say online, companies can aim "behavioural" ads at those most likely to buy.

[P2] In the past couple of weeks a quarrel has illustrated the value to advertisers of such fine-grained information: Should advertisers assume that people are happy to be tracked and sent behavioural ads? Or should they have explicit permission?

[P3] In December 2010 America's Federal Trade Commission (FTC) proposed adding a "do not track" (DNT) option to internet browsers, so that users could tell advertisers that they did not want to be followed. Microsoft's Internet Explorer and Apple's Safari both offer DNT; Google's Chrome is due to do so this year. In February the FTC and the Digital Advertising Alliance (DAA) agreed that the industry would get cracking on responding to DNT requests.

[P4] On May 31st Microsoft set off the row. It said that Internet Explorer 10, the version due to appear with Windows 8, would have DNT as a default.

[P5] Advertisers are horrified. Human nature being what it is, most people stick with default settings. Few switch DNT on now, but if tracking is off it will stay off. Bob Liodice, the chief executive of the Association of National Advertisers, says consumers will be worse off if the industry cannot collect information about their preferences. People will not get fewer ads, he says. "They'll get less meaningful, less targeted ads."

[P6] It is not yet clear how advertisers will respond. Getting a DNT signal does not oblige anyone to stop tracking, although some companies have promised to do so. Unable to tell whether someone really objects to behavioural ads or whether they are sticking with Microsoft's default, some may ignore a DNT signal and press on anyway.

[P7] Also unclear is why Microsoft has gone it alone. After all, it has an ad business too, which it says will comply with DNT requests, though it is still working out how. If it is trying to upset Google, which relies almost wholly on advertising, it has chosen an indirect method: There is no guarantee that DNT by default will become the norm. DNT does not seem an obviously huge selling point for Windows 8—though the firm has compared some of its other products favourably with Google's on that count before. Brendon Lynch, Microsoft's chief privacy officer, blogged: "We believe consumers should have more control." Could it really be that simple?

2.2

第一次做题：作答 26-30 题

现在才看选项。先独立完成五道题；需要时回原文定位。

26. It is suggested in Paragraph 1 that "behavioural" ads help advertisers to

- [A] lower their operational costs.
- [B] ease competition among themselves.
- [C] avoid complaints from consumers.
- [D] provide better online services.

27. "The industry" (Line 5, Para. 3) refers to

- [A] online advertisers.
- [B] e-commerce conductors.
- [C] digital information analysts.
- [D] internet browser developers.

28. Bob Liodice holds that setting DNT as a default

- [A] goes against human nature.
- [B] fails to affect the ad industry.
- [C] will not benefit consumers.
- [D] may cut the number of junk ads.

29. Which of the following is true according to Paragraph 6?

- [A] Advertisers are willing to implement DNT.
- [B] DNT may not serve its intended purpose.
- [C] DNT is losing its popularity among consumers.
- [D] Advertisers are obliged to offer behavioural ads.

30. The author's attitude towards what Brendon Lynch said in his blog is one of

- [A] appreciation.
- [B] understanding.
- [C] indulgence.
- [D] skepticism.

3.1

第 1 段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 An old saying has it that half of all advertising budgets are wasted-the trouble is, no one knows which half.

S2 In the internet age, at least in theory, this fraction can be much reduced.

S3 By watching what people search for, click on and say online, companies can aim "behavioural" ads at those most likely to buy.

本段英语原文（按句分行）

S3 Unable to tell whether someone really objects to behavioural ads or whether they are sticking with Microsoft's default, some may ignore a DNT signal and press on anyway.

段落中心思想 (用一句话概括)

3.7

第 7 段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 Also unclear is why Microsoft has gone it alone.

S2 After all, it has an ad business too, which it says will comply with DNT requests, though it is still working out how.

S3 If it is trying to upset Google, which relies almost wholly on advertising, it has chosen an indirect method: There is no guarantee that DNT by default will become the norm.

S4 DNT does not seem an obviously huge selling point for Windows 8-though the firm has compared some of its other products favourably with Google's on that count before.

S5 Brendon Lynch, Microsoft's chief privacy officer, blogged: "We believe consumers should have more control." Could it really be that simple?

全文核对后：正式重做 26-30 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

26. It is suggested in Paragraph 1 that "behavioural" ads help advertisers to

- [A] lower their operational costs.
- [B] ease competition among themselves.
- [C] avoid complaints from consumers.
- [D] provide better online services.

27. "The industry" (Line 5, Para. 3) refers to

- [A] online advertisers.
- [B] e-commerce conductors.
- [C] digital information analysts.
- [D] internet browser developers.

28. Bob Liodice holds that setting DNT as a default

- [A] goes against human nature.
- [B] fails to affect the ad industry.
- [C] will not benefit consumers.
- [D] may cut the number of junk ads.

29. Which of the following is true according to Paragraph 6?

- [A] Advertisers are willing to implement DNT.
- [B] DNT may not serve its intended purpose.
- [C] DNT is losing its popularity among consumers.
- [D] Advertisers are obliged to offer behavioural ads.

30. The author's attitude towards what Brendon Lynch said in his blog is one of

- [A] appreciation.
- [B] understanding.
- [C] indulgence.
- [D] skepticism.

5 原文 D: 第二次做题后定位

先不看解析，回原文再找一次定位句和同义替换。

[P1] An old saying has it that half of all advertising budgets are wasted—the trouble is, no one knows which half. In the internet age, at least in theory, this fraction can be much reduced. By watching what people search for, click on and say online, companies can aim "behavioural" ads at those most likely to buy.

[P2] In the past couple of weeks a quarrel has illustrated the value to advertisers of such fine-grained information: Should advertisers assume that people are happy to be tracked and sent behavioural ads? Or should they have explicit permission?

[P3] In December 2010 America's Federal Trade Commission (FTC) proposed adding a "do not track" (DNT) option to internet browsers, so that users could tell advertisers that they did not want to be followed. Microsoft's Internet Explorer and Apple's Safari both offer DNT; Google's Chrome is due to do so this year. In February the FTC and the Digital Advertising Alliance (DAA) agreed that the industry would get cracking on responding to DNT requests.

[P4] On May 31st Microsoft set off the row. It said that Internet Explorer 10, the version due to appear with Windows 8, would have DNT as a default.

[P5] Advertisers are horrified. Human nature being what it is, most people stick with default settings. Few switch DNT on now, but if tracking is off it will stay off. Bob Liodice, the chief executive of the Association of National Advertisers, says consumers will be worse off if the industry cannot collect information about their preferences. People will not get fewer ads, he says. "They'll get less meaningful, less targeted ads."

[P6] It is not yet clear how advertisers will respond. Getting a DNT signal does not oblige anyone to stop tracking, although some companies have promised to do so. Unable to tell whether someone really objects to behavioural ads or whether they are sticking with Microsoft's default, some may ignore a DNT signal and press on anyway.

[P7] Also unclear is why Microsoft has gone it alone. After all, it has an ad business too, which it says will comply with DNT requests, though it is still working out how. If it is trying to upset Google, which relies almost wholly on advertising, it has chosen an indirect method: There is no guarantee that DNT by default will become the norm. DNT does not seem an obviously huge selling point for Windows 8—though the firm has compared some of its other products favourably with Google's on that count before. Brendon Lynch, Microsoft's chief privacy officer, blogged: "We believe consumers should have more control." Could it really be that simple?
