

2014 英语 (一) Part A · Text 3

精读全流程：原文、做题、笔译、订正、重做、选项与复读

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 31-35 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

No.	Question stem - English only	Signal

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] The US \$3-million Fundamental Physics Prize is indeed an interesting experiment, as Alexander Polyakov said when he accepted this year's award in March. And it is far from the only one of its type. As a News Feature article in Nature discusses, a string of lucrative awards for researchers have joined the Nobel Prizes in recent years. Many, like the Fundamental Physics Prize, are funded from the telephone-number-sized bank accounts of Internet entrepreneurs. These benefactors have succeeded in their chosen fields, they say, and they want to use their wealth to draw attention to those who have succeeded in science.

[P2] What's not to like? Quite a lot, according to a handful of scientists quoted in the News Feature. You cannot buy class, as the old saying goes, and these upstart entrepreneurs cannot buy their prizes the prestige of the Nobels. The new awards are an exercise in self-promotion for those behind them, say scientists. They could distort the achievement-based system of peer-review-led research. They could cement the status quo of peer-reviewed research. They do not fund peer-reviewed research. They perpetuate the myth of the lone genius.

[P3] The goals of the prize-givers seem as scattered as the criticism. Some want to shock, others to draw people into science, or to better reward those who have made their careers in research.

[P4] As Nature has pointed out before, there are some legitimate concerns about how science prizes—both new and old—are distributed. The Breakthrough Prize in Life Sciences, launched this year, takes an unrepresentative view of what the life sciences include. But the Nobel Foundation's limit of three recipients per prize, each of whom must still be living, has long been outgrown by the collaborative nature of modern research—as will be demonstrated by the inevitable row over who is ignored when it comes to acknowledging the discovery of the Higgs boson. The Nobels were, of course, themselves set up by a very rich individual who had decided what he wanted to do with his own money. Time, rather than intention, has given them legitimacy.

[P5] As much as some scientists may complain about the new awards, two things seem clear. First, most researchers would accept such a prize if they were offered one. Second, it is surely a good thing that the money and attention come to science rather than go elsewhere. It is fair to criticize and question the mechanism—that is the culture of research, after all—but it is the prize-givers' money to do with as they please. It is wise to take such gifts with gratitude and grace.

2.2

第一次做题：作答 31-35 题

现在才看选项。先独立完成五道题；需要时回原文定位。

31. The Fundamental Physics Prize is seen as

- [A] a symbol of the entrepreneurs' wealth.
- [B] a possible replacement of the Nobel Prizes.
- [C] a handsome reward for researchers.
- [D] an example of bankers' investments.

32. The critics think that the new awards will most benefit

- [A] the profit-oriented scientists.
- [B] the founders of the awards.
- [C] the achievement-based system.
- [D] peer-review-led research.

33. The discovery of the Higgs boson is a typical case which involves

- [A] the joint effort of modern researchers.
- [B] controversies over the recipients' status.
- [C] the demonstration of research findings.
- [D] legitimate concerns over the new prizes.

34. According to Paragraph 4, which of the following is true of the Nobels?

- [A] History has never cast doubt on them.
- [B] They are the most representative honor.
- [C] Their legitimacy has long been in dispute.
- [D] Their endurance has done justice to them.

35. The author believes that the new awards are

- [A] harmful to the culture of research.
- [B] acceptable despite the criticism.
- [C] subject to undesirable changes.
- [D] unworthy of public attention.

全文核对后：正式重做 31-35 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

31. The Fundamental Physics Prize is seen as

- [A] a symbol of the entrepreneurs' wealth.
- [B] a possible replacement of the Nobel Prizes.
- [C] a handsome reward for researchers.
- [D] an example of bankers' investments.

32. The critics think that the new awards will most benefit

- [A] the profit-oriented scientists.
- [B] the founders of the awards.
- [C] the achievement-based system.
- [D] peer-review-led research.

33. The discovery of the Higgs boson is a typical case which involves

- [A] the joint effort of modern researchers.
- [B] controversies over the recipients' status.
- [C] the demonstration of research findings.
- [D] legitimate concerns over the new prizes.

34. According to Paragraph 4, which of the following is true of the Nobels?

- [A] History has never cast doubt on them.
- [B] They are the most representative honor.
- [C] Their legitimacy has long been in dispute.
- [D] Their endurance has done justice to them.

35. The author believes that the new awards are

- [A] harmful to the culture of research.
- [B] acceptable despite the criticism.
- [C] subject to undesirable changes.
- [D] unworthy of public attention.

5 原文 D：第二次做题后定位

先看解析，回原文再找一次定位句和同义替换。

[P1] The US \$3-million Fundamental Physics Prize is indeed an interesting experiment, as Alexander Polyakov said when he accepted this year's award in March. And it is far from the only one of its type. As a News Feature article in *Nature* discusses, a string of lucrative awards for researchers have joined the Nobel Prizes in recent years. Many, like the Fundamental Physics Prize, are funded from the telephone-number-sized bank accounts of Internet entrepreneurs. These benefactors have succeeded in their chosen fields, they say, and they want to use their wealth to draw attention to those who have succeeded in science.

[P2] What's not to like? Quite a lot, according to a handful of scientists quoted in the News Feature. You cannot buy class, as the old saying goes, and these upstart entrepreneurs cannot buy their prizes the prestige of the Nobels. The new awards are an exercise in self-promotion for those behind them, say scientists. They could distort the achievement-based system of peer-review-led research. They could cement the status quo of peer-reviewed research. They do not fund peer-reviewed research. They perpetuate the myth of the lone genius.

[P3] The goals of the prize-givers seem as scattered as the criticism. Some want to shock, others to draw people into science, or to better reward those who have made their careers in research.

[P4] As Nature has pointed out before, there are some legitimate concerns about how science prizes—both new and old—are distributed. The Breakthrough Prize in Life Sciences, launched this year, takes an unrepresentative view of what the life sciences include. But the Nobel Foundation's limit of three recipients per prize, each of whom must still be living, has long been outgrown by the collaborative nature of modern research—as will be demonstrated by the inevitable row over who is ignored when it comes to acknowledging the discovery of the Higgs boson. The Nobels were, of course, themselves set up by a very rich individual who had decided what he wanted to do with his own money. Time, rather than intention, has given them legitimacy.

[P5] As much as some scientists may complain about the new awards, two things seem clear. First, most researchers would accept such a prize if they were offered one. Second, it is surely a good thing that the money and attention come to science rather than go elsewhere. It is fair to criticize and question the mechanism—that is the culture of research, after all—but it is the prize-givers' money to do with as they please. It is wise to take such gifts with gratitude and grace.
