

2015 英语 (一) Part A · Text 2

精读全流程：原文、做题、笔译、订正、重做、选项与复读

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 26-30 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

2 干净原文 A：限时读文

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] Just how much does the Constitution protect your digital data? The Supreme Court will now consider whether police can search the contents of a mobile phone without a warrant if the phone is on or around a person during an arrest.

[P2] California has asked the justices to refrain from a sweeping ruling, particularly one that upsets the old assumption that authorities may search through the possessions of suspects at the time of their arrest. It is hard, the state argues, for judges to assess the implications of new and rapidly changing technologies.

[P3] The court would be recklessly modest if it followed California's advice. Enough of the implications are discernable, even obvious, so that the justices can and should provide updated guidelines to police, lawyers and defendants.

[P4] They should start by discarding California's lame argument that exploring the contents of a smartphone—a vast storehouse of digital information—is similar to, say, going through a suspect's purse. The court has ruled that police don't violate the Fourth Amendment when they go through the wallet or pocketbook of an arrestee without a warrant. But exploring one's smartphone is more like entering his or her home. A smartphone may contain an arrestee's reading history, financial history, medical history and comprehensive records of recent correspondence. The development of "cloud computing", meanwhile, has made that exploration so much the easier.

[P5] Americans should take steps to protect their digital privacy. But keeping sensitive information on these devices is increasingly a requirement of normal life. Citizens still have a right to expect private documents to remain private and protected by the Constitution's prohibition on unreasonable searches.

[P6] As so often is the case, stating that principle doesn't ease the challenge of line- drawing. In many cases, it would not be overly burdensome for authorities to obtain a warrant to search through phone contents. They could still invalidate Fourth Amendment protections when facing severe, urgent circumstances, and they could take reasonable measures to ensure that phone data are not erased or altered while waiting for a warrant. The court, though, may want to allow room for police to cite situations where they are entitled to more freedom.

[P7] But the justices should not swallow California's argument whole. New, disruptive technology sometimes demands novel applications of the Constitution's protections. Orin Kerr, a law professor, compares the explosion and accessibility of digital information in the 21st century with the establishment of automobile use as a virtual necessity of life in the 20th: The justices had to specify novel rules for the new personal domain of the passenger car then; they must sort out how the Fourth Amendment applies to digital information now.

第一次做题：作答 26-30 题

现在才看选项。先独立完成五道题；需要时回原文定位。

26. The Supreme Court will work out whether, during an arrest, it is legitimate to

- [A] search for suspects' mobile phones without a warrant.
- [B] check suspects' phone contents without being authorized.
- [C] prevent suspects from deleting their phone contents.
- [D] prohibit suspects from using their mobile phones.

27. The author's attitude toward California's argument is one of

- [A] tolerance.
- [B] indifference.
- [C] disapproval.
- [D] cautiousness.

28. The author believes that exploring one's phone contents is comparable to

- [A] getting into one's residence.
- [B] handling one's historical records.
- [C] scanning one's correspondences.
- [D] going through one's wallet.

29. In Paragraphs 5 and 6, the author shows his concern that

- [A] principles are hard to be clearly expressed.
- [B] the court is giving police less room for action.
- [C] phones are used to store sensitive information.
- [D] citizens' privacy is not effectively protected.

30. Orin Kerr's comparison is quoted to indicate that

- [A] the Constitution should be implemented flexibly.
- [B] new technology requires reinterpretation of the Constitution.
- [C] California's argument violates principles of the Constitution.
- [D] principles of the Constitution should never be altered.

全文核对后：正式重做 26-30 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

26. The Supreme Court will work out whether, during an arrest, it is legitimate to

- [A] search for suspects' mobile phones without a warrant.
- [B] check suspects' phone contents without being authorized.
- [C] prevent suspects from deleting their phone contents.
- [D] prohibit suspects from using their mobile phones.

27. The author's attitude toward California's argument is one of

- [A] tolerance.
- [B] indifference.
- [C] disapproval.
- [D] cautiousness.

28. The author believes that exploring one's phone contents is comparable to

- [A] getting into one's residence.
- [B] handling one's historical records.
- [C] scanning one's correspondences.
- [D] going through one's wallet.

29. In Paragraphs 5 and 6, the author shows his concern that

- [A] principles are hard to be clearly expressed.
- [B] the court is giving police less room for action.
- [C] phones are used to store sensitive information.
- [D] citizens' privacy is not effectively protected.

30. Orin Kerr's comparison is quoted to indicate that

- [A] the Constitution should be implemented flexibly.
- [B] new technology requires reinterpretation of the Constitution.
- [C] California's argument violates principles of the Constitution.
- [D] principles of the Constitution should never be altered.

5 原文 D：第二次做题后定位

先看解析，回原文再找一次定位句和同义替换。

[P1] Just how much does the Constitution protect your digital data? The Supreme Court will now consider whether police can search the contents of a mobile phone without a warrant if the phone is on or around a person during an arrest.

[P2] California has asked the justices to refrain from a sweeping ruling, particularly one that upsets the old assumption that authorities may search through the possessions of suspects at the time of their arrest. It is hard, the state argues, for judges to assess the implications of new and rapidly changing technologies.

[P3] The court would be recklessly modest if it followed California's advice. Enough of the implications are discernable, even obvious, so that the justices can and should provide updated guidelines to police, lawyers and defendants.

[P4] They should start by discarding California's lame argument that exploring the contents of a smartphone—a vast storehouse of digital information—is similar to, say, going through a suspect's purse. The court has ruled that police don't violate the Fourth Amendment when they go through the wallet or pocketbook of an arrestee without a warrant. But exploring one's smartphone is more like entering his or her home. A smartphone may contain an arrestee's reading history, financial history, medical history and comprehensive records of recent correspondence. The development of "cloud computing", meanwhile, has made that exploration so much the easier.

[P5] Americans should take steps to protect their digital privacy. But keeping sensitive information on these devices is increasingly a requirement of normal life. Citizens still have a right to expect private documents to remain private and protected by the Constitution's prohibition on unreasonable searches.

[P6] As so often is the case, stating that principle doesn't ease the challenge of line- drawing. In many cases, it would not be overly burdensome for authorities to obtain a warrant to search through phone contents. They could still invalidate Fourth Amendment protections when facing severe, urgent circumstances, and they could take reasonable measures to ensure that phone data are not erased or altered while waiting for a warrant. The court, though, may want to allow room for police to cite situations where they are entitled to more freedom.

[P7] But the justices should not swallow California's argument whole. New, disruptive technology sometimes demands novel applications of the Constitution's protections. Orin Kerr, a law professor, compares the explosion and accessibility of digital information in the 21st century with the establishment of automobile use as a virtual necessity of life in the 20th: The justices had to specify novel rules for the new personal domain of the passenger car then; they must sort out how the Fourth Amendment applies to digital information now.
