

2015 英语 (一) Part A · Text 3

精读全流程：原文、做题、笔译、订正、重做、选项与复读

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 31-35 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

No.	Question stem - English only	Signal
31	It can be learned from Paragraph 1 that	
32	The phrase "flagged up" (Para. 2) is the closest in meaning to	
33	Giovanni Parmigiani believes that the establishment of the SBoRE may	
34	David Vaux holds that what Science is doing now	
35	Which of the following is the best title of the text?	

标出生词但不停下；标出转折 / 因果 / 让步；读到相关段落才回来看选项。

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] The journal Science is adding an extra round of statistical checks to its peer-review process, editor-in-chief Marcia McNutt announced today. The policy follows similar efforts from other journals, after widespread concern that basic mistakes in data analysis are contributing to the irreproducibility of many published research findings.

[P2] "Readers must have confidence in the conclusions published in our journal," writes McNutt in an editorial. Working with the American Statistical Association, the journal has appointed seven experts to a statistics board of reviewing editors (SBoRE). Manuscript will be flagged up for additional scrutiny by the journal's internal editors, or by its existing Board of Reviewing Editors or by outside peer reviewers. The SBoRE panel will then find external statisticians to review these manuscripts.

[P3] Asked whether any particular papers had impelled the change, McNutt said: "The creation of the ' statistics board ' was motivated by concerns broadly with the application of statistics and data analysis in scientific research and is part of Science's overall drive to increase reproducibility in the research we publish."

[P4] Giovanni Parmigiani, a biostatistician at the Harvard School of Public Health, a member of the SBoRE group, says he expects the board to "play primarily an advisory role." He agreed to join because he "found the foresight behind the establishment of the SBoRE to be novel, unique and likely to have a lasting impact. This impact will not only be through the publications in Science itself, but hopefully through a larger group of publishing places that may want to model their approach after Science."

[P5] John Ioannidis, a physician who studies research methodology, says that the policy is "a most welcome step forward" and "long overdue." "Most journals are weak in statistical review, and this damages the quality of what they publish. I think that, for the majority of scientific papers nowadays, statistical review is more essential than expert review," he says. But he noted that biomedical journals such as *Annals of Internal Medicine*, the *Journal of the American Medical Association* and *The Lancet* pay strong attention to statistical review.

[P6] Professional scientists are expected to know how to analyze data, but statistical errors are alarmingly common in published research, according to David Vaux, a cell biologist. Researchers should improve their standards, he wrote in 2012, but journals should also take a tougher line, "engaging reviewers who are statistically literate and editors who can verify the process." Vaux says that Science's idea to pass some papers to statisticians "has some merit, but a weakness is that it relies on the board of reviewing editors to identify 'the papers that need scrutiny' in the first place."

第一次做题：作答 31-35 题

现在才看选项。先独立完成五道题；需要时回原文定位。

31. It can be learned from Paragraph 1 that

- [A] Science intends to simplify its peer-review process.
- [B] journals are strengthening their statistical checks.
- [C] few journals are blamed for mistakes in data analysis.
- [D] lack of data analysis is common in research projects.

32. The phrase "flagged up" (Para. 2) is the closest in meaning to

- [A] found.
- [B] revised.
- [C] marked.
- [D] stored.

33. Giovanni Parmigiani believes that the establishment of the SBoRE may

- [A] pose a threat to all its peers.
- [B] meet with strong opposition.
- [C] increase Science's circulation.
- [D] set an example for other journals.

34. David Vaux holds that what Science is doing now

- [A] adds to researchers' workload.
- [B] diminishes the role of reviewers.
- [C] has room for further improvement.
- [D] is to fail in the foreseeable future.

35. Which of the following is the best title of the text?

- [A] Science Joins Push to Screen Statistics in Papers
- [B] Professional Statisticians Deserve More Respect
- [C] Data Analysis Finds Its Way onto Editors' Desks
- [D] Statisticians Are Coming Back with Science

3.1

第 1 段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 The journal Science is adding an extra round of statistical checks to its peer-review process, editor-in-chief Marcia McNutt announced today.

S2 The policy follows similar efforts from other journals, after widespread concern that basic mistakes in data analysis are contributing to the irreproducibility of many published research findings.

本段英语原文（按句分行）

S1 The journal Science is adding an extra round of statistical checks to its peer-review process, editor-in-chief Marcia McNutt announced today.

S2 The policy follows similar efforts from other journals, after widespread concern that basic mistakes in data analysis are contributing to the irreproducibility of many published research findings.

段落中心思想 (用一句话概括)

第 2 段：逐句笔译与原文订正

S1 "Readers must have confidence in the conclusions published in our journal," writes McNutt in an editorial.

S3 Manuscript will be flagged up for additional scrutiny by the journal's internal editors, or by its existing Board of Reviewing Editors or by outside peer reviewers.

S4 The SBoRE panel will then find external statisticians to review these manuscripts.

全文核对后：正式重做 31-35 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

31. It can be learned from Paragraph 1 that

- [A] Science intends to simplify its peer-review process.
- [B] journals are strengthening their statistical checks.
- [C] few journals are blamed for mistakes in data analysis.
- [D] lack of data analysis is common in research projects.

32. The phrase "flagged up" (Para. 2) is the closest in meaning to

- [A] found.
- [B] revised.
- [C] marked.
- [D] stored.

33. Giovanni Parmigiani believes that the establishment of the SBoRE may

- [A] pose a threat to all its peers.
- [B] meet with strong opposition.
- [C] increase Science's circulation.
- [D] set an example for other journals.

34. David Vaux holds that what Science is doing now

- [A] adds to researchers' workload.
- [B] diminishes the role of reviewers.
- [C] has room for further improvement.
- [D] is to fail in the foreseeable future.

35. Which of the following is the best title of the text?

- [A] Science Joins Push to Screen Statistics in Papers
- [B] Professional Statisticians Deserve More Respect
- [C] Data Analysis Finds Its Way onto Editors' Desks
- [D] Statisticians Are Coming Back with Science

5 原文 D：第二次做题后定位

先看解析，回原文再找一次定位句和同义替换。

[P1] The journal Science is adding an extra round of statistical checks to its peer-review process, editor-in-chief Marcia McNutt announced today. The policy follows similar efforts from other journals, after widespread concern that basic mistakes in data analysis are contributing to the irreproducibility of many published research findings.

[P2] "Readers must have confidence in the conclusions published in our journal," writes McNutt in an editorial. Working with the American Statistical Association, the journal has appointed seven experts to a statistics board of reviewing editors (SBoRE). Manuscript will be flagged up for additional scrutiny by the journal's internal editors, or by its existing Board of Reviewing Editors or by outside peer reviewers. The SBoRE panel will then find external statisticians to review these manuscripts.

[P3] Asked whether any particular papers had impelled the change, McNutt said: "The creation of the ' statistics board ' was motivated by concerns broadly with the application of statistics and data analysis in scientific research and is part of Science's overall drive to increase reproducibility in the research we publish."

[P4] Giovanni Parmigiani, a biostatistician at the Harvard School of Public Health, a member of the SBoRE group, says he expects the board to "play primarily an advisory role." He agreed to join because he "found the foresight behind the establishment of the SBoRE to be novel, unique and likely to have a lasting impact. This impact will not only be through the publications in Science itself, but hopefully through a larger group of publishing places that may want to model their approach after Science."

[P5] John Ioannidis, a physician who studies research methodology, says that the policy is "a most welcome step forward" and "long overdue." "Most journals are weak in statistical review, and this damages the quality of what they publish. I think that, for the majority of scientific papers nowadays, statistical review is more essential than expert review," he says. But he noted that biomedical journals such as Annals of Internal Medicine, the Journal of the American Medical Association and The Lancet pay strong attention to statistical review.

[P6] Professional scientists are expected to know how to analyze data, but statistical errors are alarmingly common in published research, according to David Vaux, a cell biologist. Researchers should improve their standards, he wrote in 2012, but journals should also take a tougher line, "engaging reviewers who are statistically literate and editors who can verify the process." Vaux says that Science's idea to pass some papers to statisticians "has some merit, but a weakness is that it relies on the board of reviewing editors to identify 'the papers that need scrutiny' in the first place."
