

2018 英语 (一) Part A · Text 3

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 31-35 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] Any fair-minded assessment of the dangers of the deal between Britain's National Health Service (NHS) and DeepMind must start by acknowledging that both sides mean well. DeepMind is one of the leading artificial intelligence (AI) companies in the world. The potential of this work applied to healthcare is very great, but it could also lead to further concentration of power in the tech giants. It is against that background that the information commissioner, Elizabeth Denham, has issued her damning verdict against the Royal Free hospital trust under the NHS, which handed over to DeepMind the records of 1.6 million patients in 2015 on the basis of a vague agreement which took far too little account of the patients' rights and their expectations of privacy.

[P2] DeepMind has almost apologised. The NHS trust has mended its ways. Further arrangements—and there may be many—between the NHS and DeepMind will be carefully scrutinised to ensure that all necessary permissions have been asked of patients and all unnecessary data has been cleaned. There are lessons about informed patient consent to learn. But privacy is not the only angle in this case and not even the most important. Ms Denham chose to concentrate the blame on the NHS trust, since under existing law it "controlled" the data and DeepMind merely "processed" it. But this distinction misses the point that it is processing and aggregation, not the mere possession of bits, that gives the data value.

[P3] The great question is who should benefit from the analysis of all the data that our lives now generate. Privacy law builds on the concept of damage to an individual from identifiable knowledge about them. That misses the way the surveillance economy works. The data of an individual there gains its value only when it is compared with the data of countless millions more.

[P4] The use of privacy law to curb the tech giants in this instance feels slightly maladapted. This practice does not address the real worry. It is not enough to say that the algorithms DeepMind develops will benefit patients and save lives. What matters is that they will belong to a private monopoly which developed them using public resources. If software promises to save lives on the scale that drugs now can, big data may be expected to behave as big pharma has done. We are still at the beginning of this revolution and small choices now may turn out to have gigantic consequences later. A long struggle will be needed to avoid a future of digital feudalism. Ms Denham's report is a welcome start.

2.2

第一次做题：作答 31-35 题

现在才看选项。先独立完成五道题；需要时回原文定位。

31. What is true of the agreement between the NHS and DeepMind?

- [A] It fell short of the latter's expectations.
- [B] It caused conflicts among tech giants.
- [C] It failed to pay due attention to patients' rights.
- [D] It put both sides into a dangerous situation.

32. The NHS trust responded to Denham's verdict with

- [A] empty promises.
- [B] tough resistance.
- [C] sincere apologies.
- [D] necessary adjustments.

33. The author argues in Paragraph 2 that

- [A] privacy protection must be secured at all costs.
- [B] the value of data comes from the processing of it.
- [C] making profits from patients' data is illegal.
- [D] leaking patients' data is worse than selling it.

34. According to the last paragraph, the real worry arising from this deal is

- [A] the monopoly of big data by tech giants.
- [B] the vicious rivalry among big pharmas.
- [C] the uncontrolled use of new software.
- [D] the ineffective enforcement of privacy law.

35. The author's attitude toward the application of AI to healthcare is

- [A] ambiguous.
- [B] appreciative.
- [C] cautious.
- [D] contemptuous.

第 2 段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 DeepMind has almost apologised.

S2 The NHS trust has mended its ways.

S3 Further arrangements-and there may be many-between the NHS and DeepMind will be carefully scrutinised to ensure that all necessary permissions have been asked of patients and all unnecessary data has been cleaned.

S4 There are lessons about informed patient consent to learn.

S5 But privacy is not the only angle in this case and not even the most important.

S6 Ms Denham chose to concentrate the blame on the NHS trust, since under existing law it "controlled" the data and DeepMind merely "processed" it.

S7 But this distinction misses the point that it is processing and aggregation, not the mere possession of bits, that gives the data value.

3.4

第4段：逐句笔译与原文订正

直接在英文上标记主干和逻辑；长句留两行，短句留一行。

S1 The use of privacy law to curb the tech giants in this instance feels slightly maladapted.

S2 This practice does not address the real worry.

S3 It is not enough to say that the algorithms DeepMind develops will benefit patients and save lives.

S4 What matters is that they will belong to a private monopoly which developed them using public resources.

S5 If software promises to save lives on the scale that drugs now can, big data may be expected to behave as big pharma has done.

S6 We are still at the beginning of this revolution and small choices now may turn out to have gigantic consequences later.

S7 A long struggle will be needed to avoid a future of digital feudalism.

S8 Ms Denham's report is a welcome start.
