

2022 英语 (一) Part A · Text 3

文章主题	通读后用一句话自行概括
限时阶段	18-22 分钟：先看题干，不看选项；读文不查词
笔译阶段	按段笔译、按段核对；先写粗译，不追求参考译文式中文
重做阶段	全文核对完成后，统一重做 31-35 题
第二天	遮住译文重读、重做题、复查错因与替换词

连续干净原文用于真实检测；笔译原文用于逐段输出；原文修改页用于在英文上订正。答案与解析请对照纸质版。

限时第一读：先看 5 个英文题干，不看选项

No.	Question stem - English only	Signal
31	According to Paragraph 1, art-science collaborations have	
32	The reworked version of The Four Seasons is mentioned to show that	
33	Some artists seem to worry that in the art-science partnership	
34	What does the author say about CAVS?	
35	In the last paragraph, the author holds that art-science collaborations	

标出生词但不停下；标出转折/因果/让步；读到相关段落才回来看选项。

干净原文 A：限时读文

现在开始计时。此处没有结构、词义或逻辑提示；读到相应段落，就做相应题目。

[P1] Enlightening, challenging, stimulating, fun. These were some of the words that Nature readers used to describe their experiences of art-science collaborations in a series of articles on partnerships between artists and researchers. Nearly 40% of the roughly 350 people who responded to an accompanying poll said they had collaborated with artists; and almost all said they would consider doing so in future.

[P2] Such an encouraging result is not surprising. Scientists are increasingly seeking out visual artists to help them communicate their work to new audiences. "Artists help scientists reach a broader audience and make emotional connections that enhance learning," one respondent said.

[P3] One example of how artists and scientists have together rocked the senses came last month when the Sydney Symphony Orchestra performed a reworked version of Antonio Vivaldi's The Four Seasons. They reimagined the 300-year-old score by injecting the latest climate prediction data for each season—provided by Monash University's Climate Change Communication Research Hub. The performance was a creative call to action ahead of November's United Nations Climate Change Conference in Glasgow, UK.

[P4] But a genuine partnership must be a two-way street. Fewer artists than scientists responded to the Nature poll; however, several respondents noted that artists do not simply assist scientists with their communication requirements. Nor should their work be considered only as an object of study. The alliances are most valuable when scientists and artists have a shared stake in a project, are able to jointly design it and can critique each other's work. Such an approach can both prompt new research as well as result in powerful art.

[P5] More than half a century ago, the Massachusetts Institute of Technology opened its Center for Advanced Visual Studies (CAVS) to explore the role of technology in culture. The founders deliberately focused their projects around light—hence the 'visual studies' in the name. Light was a something that both artists and scientists had an interest in, and therefore could form the basis of collaboration. As science and technology progressed, and divided into more sub-disciplines, the centre was simultaneously looking to a time when leading researchers could also be artists, writers and poets, and vice versa.

[P6] Nature's poll findings suggest that this trend is as strong as ever, but, to make a collaboration work, both sides need to invest time, and embrace surprise and challenge. The reach of art-science tie-ups needs to go beyond the necessary purpose of research communication, and participants must not fall into the trap of stereotyping each other. Artists and scientists alike are immersed in discovery and invention, and challenge and critique are core to both, too.

第一次做题：作答 31-35 题

现在才看选项。先独立完成五道题；需要时回原文定位。

31. According to Paragraph 1, art-science collaborations have

- [A] caught the attention of critics.
- [B] received favourable responses.
- [C] promoted academic publishing.
- [D] sparked heated public disputes.

32. The reworked version of The Four Seasons is mentioned to show that

- [A] art can offer audiences easy access to science.
- [B] science can help with the expression of emotions.
- [C] public participation in science has a promising future.
- [D] art is effective in facilitating scientific innovations.

33. Some artists seem to worry that in the art-science partnership

- [A] their role may be underestimated.
- [B] their reputation may be impaired.
- [C] their creativity may be inhibited.
- [D] their work may be misguided.

34. What does the author say about CAVS?

- [A] It was headed alternately by artists and scientists.
- [B] It exemplified valuable art-science alliances.
- [C] Its projects aimed at advancing visual studies.
- [D] Its founders sought to raise the status of artists.

35. In the last paragraph, the author holds that art-science collaborations

- [A] are likely to go beyond public expectations.
- [B] will intensify interdisciplinary competition.
- [C] should do more than communicating science.
- [D] are becoming more popular than before.

第 1 段：逐句笔译与原文订正

S1 Enlightening, challenging, stimulating, fun.

S3 Nearly 40% of the roughly 350 people who responded to an accompanying poll said they had collaborated with artists; and almost all said they would consider doing so in future.

S1 Enlightening, challenging, stimulating, fun.

S2 These were some of the words that Nature readers used to describe their experiences of art-science collaborations in a series of articles on partnerships between artists and researchers.

全文核对后：正式重做 31-35 题

再次独立作答。只看题干和选项；需要时回原文圈出定位句。

31. According to Paragraph 1, art-science collaborations have

- [A] caught the attention of critics.
- [B] received favourable responses.
- [C] promoted academic publishing.
- [D] sparked heated public disputes.

32. The reworked version of The Four Seasons is mentioned to show that

- [A] art can offer audiences easy access to science.
- [B] science can help with the expression of emotions.
- [C] public participation in science has a promising future.
- [D] art is effective in facilitating scientific innovations.

33. Some artists seem to worry that in the art-science partnership

- [A] their role may be underestimated.
- [B] their reputation may be impaired.
- [C] their creativity may be inhibited.
- [D] their work may be misguided.

34. What does the author say about CAVS?

- [A] It was headed alternately by artists and scientists.
- [B] It exemplified valuable art-science alliances.
- [C] Its projects aimed at advancing visual studies.
- [D] Its founders sought to raise the status of artists.

35. In the last paragraph, the author holds that art-science collaborations

- [A] are likely to go beyond public expectations.
- [B] will intensify interdisciplinary competition.
- [C] should do more than communicating science.
- [D] are becoming more popular than before.
